

# Layout Notes

- Designed with a 12 column grid
- Colors shown in layout page may not be actual colors – just used to differentiate elements
- Similarly, elements will likely take up the entirety of the columns, but are shown not taking up the full column to better represent hierarchy of divs
  - E.g. in the instruction/selector pane on the left, there will be a div containing all of the selectors, as well as one for the “advanced” section which will (hopefully) be able to be shown/minimized using a button

# My Dashboard Title

## Instructions

Title multi-select dropdown

Year slider

Movie/Show Dropdown

IF SHOW: season, episode dropdowns  
(2, side by side)

Device Dropdown

Advanced ▼

ImgCount slider

AvgRating slider

NumVotes slider

[Interact with app;  
select data here]

### Visualization 1:

Line chart of TV show rating  
over time

### Visualization 2:

Scatterplot of rating compared  
to how many Apple devices are  
in the movie/episode

### Visualization 3:

Pie chart of which devices are in  
the most movies/episodes

### Visualization 4:

Bar graph showing how many  
movies/episodes have each  
type of device

### Visualization 5:

Pie chart or line chart of  
imgCount (good for TV shows,  
esp if just 1-2 seasons)

### Visualization 6:

TBD later – if decide not to  
include, have other 2 viz on this  
row take more columns
